Are you looking for the Animals name in English? This article will help you with that by providing all the different types of common animal names in the world. Let's learn the list of animals' names with English! (Iviti right now)! See more at: English Words Animals Names Animals are living beings that have the ability to move and react like humans. They are also able to communicate with each other and the environment. Different Types of Animals Name Animals are classified depending on their habitat and way of living: Wild Animals: Wild animals are those species of animals that are not domesticated and not controlled by humans. They live in their natural habitats and do not live with humans or other domestic species. Mammals: Mammals are a class of vertebrates distinguished from reptiles by the possession of hair, three middle ear bones, and mammary glands. Pet Animals: Pets are a part of human life. They have been used as companions and to entertain us. Nowadays, they are also used as a source of income. Sea Animals: Sea life is also important to many people because it provides a home for many species of plants and animals such as corals and plankton which help make up the food chain by providing oxygen for marine life to breathe Birds: Birds are generally small, and have a long thin beak and short legs. They are mostly active during the day and feed on seeds, fruit, and insects. Farm or Domestic Animal: Farm animals are raised to provide food and livestock, while domestic animals are kept as pets. Insects: Insects are an animal that has a hard exoskeleton and jointed legs. The exoskeleton protects the insect from predators. Insects are also capable of walking on water or flying.
